little ambassadors

Our little ambassadors tell our story better than we ever could.

“ We are so thankful for the excellent care we have received from our eye doctors. After being told that blindness was a real possibility, we are grateful that we got help, followed the doctor's orders and have success! ”

Stuart

Stuart & Family

“ We have never met such a caring team of doctors who took in our family like their own during one of the most difficult times of our lives. We feel as though it is through research funded through organizations such as The Children's Eye Foundation that Hallie's Ophthalmologists can continue to give her the best medical care available. ”

Children's Eye Foundation

There are about 20 million children under the age of five in the United States. About one million of these children have an eye disorder that could lead to permanent loss of vision. To fight vision loss, the mission of the Children's Eye Foundation is clear: to eliminate preventable blindness in children. For more than forty years, the Children's Eye Foundation has worked diligently to educate both the public and medical professionals about the necessity of early detection and treatment of vision disorders, with the ultimate goal of eliminating amblyopia and preventable blindness in the United States and the world.

Help for Parents and Families

When a child is diagnosed with an eye disorder, the entire family is impacted. We've heard from parents that little information is available on the Web to explain relatively common eye disorders, such as amblyopia and strabismus. We have compiled a number of resources to help parents understand these eye disorders, including:

- **Guide to Strabismus Surgery** – this comprehensive guide answers some of the most frequently asked questions about strabismus surgery
- **Amblyopia 411** – this resource helps parents to understand what to expect when their child is diagnosed with amblyopia
- **Online Forum** – parents all over the world connect with each other to share their experiences with their child's vision
- **little ambassadors** – a great tool for parents interested in showing their gratitude for the care they've received and to help raise awareness for early detection and treatment of eye disorders

All of the resources above can be found at:
childrenseyefoundation.org/For-Parents.aspx

How You Can Make a Difference

With programs like See by Three, as little as \$12 covers the cost of a vision screening for a child who otherwise would not receive it. This year more than 13,000 children will receive a vision screening because of our programs and many, many more will learn how important early detection is to successful treatment of eye disorders. Rest assured that whatever you are able to give, we are most grateful to receive.
